Work Experience

Quikspection | Full Stack Software Engineer & UI/UX Designer

July 2018 - Present

- Built and designed the entire Mobile App (Employee, Client) using TypeScript, React Native, and AWS.
- Built and designed the entire Web App (Admin, Manager, Employee) using TypeScript, React, and AWS.
- Designed and wire framed 45 mobile screens, 25 web screens, and a custom UI component library.

Moxy Solutions | Project Manager

May 2015 - Jan 2018

- Collaborated with company owners and software development team to create a web application from ground up to include core features, new features, compatibility, and a redesigned UI.
- Organized quality assurance for new SaaS features; regression testing, caching errors, browser compatibility, user interface design, server errors, memory errors, and etc.
- Drafted structured documentation for bugs, issues, new feature requests, and UI enhancements.

Moxy Solutions | Analyst

Apr 2012 - May 2015

- Analyzed data for hundreds of client sales daily for accuracy to pinpoint discrepancies and system errors, saving the company from potential financial losses.
- Managed client accounts, ensuring superior satisfaction for client requests, software enhancements, and client business expansion.

EcoATM | Kiosk Staff

Jan 2011 - Feb 2012

- Trained new employees on hardware, software, proper customer engagement, and how to promote the core values of the company to the customers.
- Conducted periodical logs and comprehensive reports for demographics, psychographics, foot traffic, mechanical problems, and UI problems.
